Shortcut Remover Crack +

Remove shortcuts created by Shortcut virus. Reclaims original files. Detects virus infestation on every drive or flash memory storage device. How to use: Click "Submit" button after scanning the drive or flash memory. A window will show. Use the scan button to check if files are created by Shortcut virus. If the virus is found, it is recommended to delete it to recover files. If this task is not possible, you will be notified. In either case, note the path where shortcuts were created in case you want to go to your drive and remove them manually. What's New In Shortcut Remover?

The Shortcut Remover is a simple, reliable, lightweight and clean software utility designed to help you get rid of shortcut virus. It is designed to help you remove the shortcuts that the Shortcut virus makes. If you are in danger, this software will not remove anything from your computer system. If you think there is something wrong with this product or service, please contact us. Please include the following information and we will use it to improve our services: Name, position, company, e-mail address, and telephone number. Shortcut Remover is a simple application that allows you to quickly and easily remove the shortcut virus from your pen drive or SD card. The software can clear the effects of the drive's virus infection, by deleting the shortcuts created by the malware and recovering the initial files. Simple to use software Shortcut Remover is a one-click software solution, since all you need to do is indicate the drive letter associated to the infected device and click on the 'Submit' button. The software can identify the indicated location, scan it and remove any shortcut created by the virus bearing the same name. You do not need to type in the colon and inverted slash, next to the letter, since it confuses the software and determines it not to identify the drive path. If this is the case, the software notifies you that the path was not found. Otherwise, it displays a message indicating a successful process. The Shortcut virus threat The Shortcut virus is a malware item that mainly affects files stored on USB drives, flash memory devices or SD cards and turns any folder or application into a shortcut. Accessing these shortcuts can determine the passing of the virus on to your computer and affecting the files stored there. Shortcut Remover allows you to prevent this threat and eliminate it early. Not only can it remove the shortcuts created by the virus, but it can also recover the files that were previously inaccessible. Lightweight application Shortcut Remover is simple to use, easy to install and allows you to remove any threat from the Shortcut virus. All you need to do is indicate the drive letter, then allow the software to scan and clean it. Thus, the application is a reliable solution for keeping the data on memory drives safe and uncorrupted. Shortcut Remover Description: The Shortcut Remover is a simple, reliable, lightweight and clean software utility designed to help you get rid of shortcut virus. It is designed to
